-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 1644

1. Claims 1, 6, 11, 16, 21, 52, 55, 57 and 62-76 are pending.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1-30-06 has been entered.
3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
4. Claims 1, 6, 11, 16, 21, 52, 55, 57, and 62-76 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a new matter rejection.

Applicant has no support in the originally filed claims or specification for the phrase "one or more" diabetic complications or for the specific range "between about 0.30mg/dl and about 0.6mg/dl". The Examiner has reviewed where Applicant states they have support for such claim language in the response filed 1-30-06, but could not find it.
5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 1644

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claim 69 is rejected under 35 U.S.C. 102(b) as being anticipated by Koenig et al.

Koenig et al., teaches measuring CRP in blood at levels about 0.60mg/dl to predict future risk of coronary heart disease, a known diabetic complication (see figure 2 in particular).

The prior art teachings anticipate the claimed invention.

It is noted the term "about" broadens the upper range of the CRP detection to encompass the claimed invention.

7. Claims 69 and 70 are rejected under 35 U.S.C. 102(a) and (e) as being anticipated by US Patent 6,040,147.

The '147 patent teaches predicting future risk of atherosclerosis, a known diabetes complication, by detecting CRP values in blood at levels about 0.60mg/dl (See figure 2, in particular), in addition the '147 patent teaches evaluating the likelihood that an individual will respond from treatment with an anti-inflammatory agent, lipid lowering agent or COX-2 inhibitor (i.e. aspirin) by measuring CRP in blood and obtaining values of 0.60 mg/dl or above.

The prior art teachings anticipate the claimed invention.

It is noted the term "about" broadens the upper range of the CRP detection to encompass the claimed invention.
